Nebraska Wesleyan University

BUS 260 Operations Management

Catalog

2013-2014

Course Description

In this course students examine the organization's production function - planning and controlling the transformation of resources into goods and services. Using both a strategic and an operational perspective, this course includes discussions and applications in both the manufacturing and service sectors. Topics include forecasting, production processing, resource allocation, critical path analysis, inventory control techniques, and total quality management.

Prerequisite(s): BUS 105 and BUS 106.

Course Hours

3 hours
