Nebraska Wesleyan University

Artificial Intelligence (AI) Literacy

Catalog

2026-2027

Program Description

The AI Literacy minor is designed for any student interested in developing their AI skills. The minor does not require any technical experience, coding, or AI background. Courses in the minor will provide hands-on experience with various AI platforms and how to use iterative prompting for enhancing human decision making and design in innovative yet ethical and socially responsible ways. This program will fully equip interested students with the expertise they need to thrive in today's competitive job market.
