Nebraska Wesleyan University

FORSC 5090 Cold Case Homicide Investigation

Catalog

2014-2015

Course Description

In this course, the participants will develop a summary of salient facts in a case investigation reconstruction. The summary will include a timeline of the crime event and subsequent investigation, an index of physical evidence with results of forensic analyses citing potential for additional testing due to new technology, a listing of witnesses, suspects and persons of interest with suggestions for further interviews and new investigative leads.
Prerequisite(s): Admittance to the Forensic Science graduation program.

Course Hours
