Nebraska Wesleyan University

IDS 1920 STEM Seminar

Catalog

2024-2025

Course Description

The purpose of this course is to explore the infinite variety of Science, Technology, Engineering, and Math (STEM) career options and paths, as well as to practice and guide aspects of personal development that will foster success for undergraduate STEM students in college and beyond. This will be accomplished through weekly discussions, presentations, and activities, including regular guest presentations from STEM-oriented professionals in industry and academia. We will also tour a local STEM-oriented company once each semester. Students are encouraged to enroll in the course multiple times throughout their college career as their STEM interests and needs evolve. Normally offered each semester. Can be taken multiple times. P/F only.
