

BIO 1300 Introduction to Environmental Science

4 hours

Majors, Minors & Degrees:

Minors

Environmental Studies

Departments/Programs:

Biology

An introduction to environmental science and scientific methodology using the environment as the system of study. The goals are to help the student develop a better understanding of the environment, gain insight into human-caused problems found in nature, explore the relationships of humanity with the environment, and provide practical experience in performing scientific measurements and experiments.

Three lectures per week.

One 3-hour lab per week.
