

CHEM 1100 Prep Chemistry

3 hours

Departments/Programs:

Chemistry

A preparatory course for **CHEM 1110 Chemical Principles I**, with a focus on developing both the quantitative, mathematical, problem-solving skill set and fundamental chemical concept knowledge encountered in a college-level general chemistry course. Topics include scientific methods, characteristics and classification of matter, measurements, mathematics of chemistry, dimensional analysis, and problem-solving.

This course may not be used for the major or for general education.
