Health and Fitness Studies (B.S.)
Health and Physical Education (B.S.)
Physical Education (B.S.)

#### Minors

**Exercise Science** 

### Departments/Programs:

Health and Human Performance

A course that will introduce students to current understandings of how complex motor skills are initially learned, and how they are controlled and refined with practice, from a behavioral point of view. A variety of activities will provide students with practical examples to deepen understanding. This course has applications to general exercise science, physical therapy, and coaching. (Normally offered each fall semester.)
