

Course:

PHYS 229 Mathematical Methods for Physics and Engineering

3 hours

Departments/Programs:

Physics

Topics may include: Laplace transform and applications; series solution of differential equations, Bessel's equation, Legendre's equation, and special functions; matrices, eigenvalues and eigenfunctions; vector analysis and applications; boundary value problems and spectral representations; Fourier series and Fourier integrals; and solution of partial differential equations of mathematical physics.

Three lectures per week.

Prerequisite(s): MATH 224 Differential Equations or permission of the instructor.
