Nebraska Wesleyan University

PHYS 252 Introduction to Quantum Physics II

Catalog

2012-2013

Course Description

A continuation of PHYS 251 Introduction to Quantum Physics I that treats phenomena in atomic, molecular, nuclear, solid-state, and high-energy physics as applications of the principles of microscopic physics.

Three lectures per week.

Prerequisite(s): PHYS 251 Introduction to Quantum Physics I and computer programming skills or permission of the instructor.

Course Hours

3 hours
