Nebraska Wesleyan University

PSYCH 212 Behavioral Neuroscience

Catalog

2012-2013

Course Description

An introduction to neurophysiological bases of general behavior, sleep, perception, emotion, learning, cognition, and mental disorders. The relevance of these topics to applied problems in psychology will also be considered, as will the methods for investigating the relationship between brain and behavior.

Prerequisite(s): PSYCH 101 Introduction to Psychological Science and BIO 050 General Biology of Plants.

(Normally offered each spring semester.)
