Nebraska Wesleyan University

ART 155 Photography 1: Darkroom

Catalog

2013-2014

Course Description

An introduction to the basic tools and techniques of black and white photography. Focus on the technical craft of using the camera, processing film, developing prints, and presenting photographs. Discussion and development of student vocabulary related to subject matter, form, and content of the photographic image in the context of historical and contemporary photographic concerns. Emphasis on student development of a creative problem-solving process related to photographic image-making.
