Nebraska Wesleyan University

ECON 110 Business and Economic Statistics

Catalog

2013-2014

Course Description

An introduction to descriptive and inferential statistics. Topics include the gathering, organizing, interpreting, and presenting of data with emphasis on hypothesis testing as a method for decision making in the fields of business and economics. Procedures examined include z-tests, t-tests, ANOVAs, correlation, and simple regression.

Prerequisite(s): Demonstrated proficiency in high school algebra or permission of the instructor.

Corequisite(s): BUSAD 109 Spreadsheet Applications.

(Normally offered each semester.)
