

PHYS 130 Computer Architecture and Interfacing

4 hours

Departments/Programs:

Physics, Astronomy, and Computer Science

A first course in the levels of architecture of a modern computer, from digital logic, through circuits and register level components, to programming. Topics include data representation, memory organization, input/output control, interfacing, and communication.

Three lectures per week.

One laboratory per week.

Prerequisite(s): PHYS-121 or CMPSC-040 or permission of the instructor.
