

## Forensic Science (M.F.S.)

Nebraska Wesleyan University offers a 42-credit-hour forensic science program through which graduate students may earn a Master of Forensic Science (MFS). The first year curriculum focuses on giving graduate students a broad-based knowledge of the forensic sciences. Over the next summer, they complete a two-week internship with a medical examiner or coroner.

During the second year, students choose between two tracks of specialization. They also participate in a yearlong crime scene investigation that counts for two credits. The last class for most students is [FORSC 5990 Research: Biology Track](#) or [FORSC 5991 Research: Investigatory and Behavioral Track](#). This course involves research and internship work relevant to students' individual interests and concentrations.

For most students, the program takes two and a half years to complete.

### Investigative Science Track

The investigative science track provides coursework in:

- crime scene investigation
- death investigation
- forensic science methods
