Course:

PHYS 2600 Computer Architecture and Interfacing

4 hours

Departments/Programs:

Physics, Astronomy, and Computer Science

A first course in the levels of architecture of a modern computer, from digital logic, through circuits and register level components, to programming. Topics include data representation, memory organization, input/output control, interfacing, and communication.
Three lectures per week.
One laboratory per week.
Prerequisite(s): PHYS 2200 Electronic Measurements or CMPSC 1500 Program Design or permission of the instructor.
(Normally offered alternate spring semesters.)
