**Nebraska Wesleyan University**

# BIO 2200 Genetics and Cell Biology

## Catalog

2016-2017

## Course Description

This course emphasizes molecular mechanisms associated with intracellular structures, metabolism, genetic information transfer, heredity, and evolution in prokaryotic and eukaryotic organisms.
Three lectures per week with one three-hour lab per week.
*Prerequisite(s): BIO 1400FYW Introduction to Biological Inquiry, CHEM 1110 Chemical Principles I , CHEM 2100 Organic Chemistry I .*
(Normally offered each semester.)

## Course Hours

4 hours

## Departments

1. Biology
