Nebraska Wesleyan University

BIO 1400FYW Introduction to Biological Inquiry

Catalog

2016-2017

Course Description

This course is designed to introduce students to collegiate biology by teaching them how to carry out scientific research. Across all sections of this course, students will pose scientific questions, design and critique experiments, run those experiments, evaluate experimental outcomes, and communicate those outcomes. Within this framework of investigative inquiry, students will learn introductory content that will not only be meaningful for the current course, but will allow for a smoother transition to their sophomore year. Content areas include ecology, genetics, evolution, biodiversity, reproduction, development, and cellular/molecular mechanisms.
Course fluidly transitions between lecture and lab with an equivalency to 3 lecture hours and 3 laboratory hours per week. No P/F.
Pre or corequisite(s): CHEM 1110 Chemical Principles I ; or prerequisite of CHEM 1100 Prep Chemistry.
(Multiple sections normally offered each semester.)

Course Hours

4 hours
