Nebraska Wesleyan University

BIO 3000 An Introduction to Biomedical Ethics

Catalog

2017-2018

Course Description

An introduction to the ethical issues raised by modern biological and medical research and clinical medicine. Case studies and readings will be used to present the following ethical issues: environmental ethics; patients' rights and physicians' responsibilities; abortion, euthanasia, and definitions of death; allocation of medical resources; humans as experimental subjects; behavioral technologies; genetic testing, screening, and manipulation; and reproductive technologies. Student participation will involve class discussions and oral and written presentations.
One 2-hour lecture/discussion session per week. No P/F.
Prerequisite(s): Junior standing and at least 16 hours in biology coursework.

Archway Curriculum: Essential Connections: Discourse Instructive
Archway Curriculum: Integrative Core: Human Health and Disease Thread
