Nebraska Wesleyan University

PSYCH 2600 Basic Learning Principles

Catalog

2017-2018

Course Description

The behaviorist viewpoint and the methodology of behavioral analysis is introduced in this course. The emphasis is on theories derived largely from non-human research and applied to everyday human behavior. Topics include an analysis of the basic operations of classical and operant conditioning and the biological constraints on learning. A practical animal lab is used to demonstrate the methods of behavior analysis and modification.
Prerequisite(s): PSYCH 1010/PSYCH 1010FYW Introduction to Psychological Science.
(Normally offered each fall semester.)

Archway Curriculum: Essential Connections: Writing Instructive
Archway Curriculum: Essential Connections: Experiential Learning: Exploratory
