PHIL 3300 Radical Philosophies

Catalog

2017-2018

Course Description

Students will explore what is radical, revolutionary, experimental, avant-garde and learn to identify what places a person, idea, or movement outside the "norm." This includes addressing questions like: What influences or impacts a philosophically innovative idea? How do we distinguish what is radical or subversive in philosophy from what is merely repetitive or conservative? Importantly, what is the effect of a philosophy on its larger culture, and what role does experience play on the philosophers who live these ideas? The course may be taken more than once with departmental approval.
