Innovation

Catalog

2020-2021

Program Description

Innovation signifies bold, creative solutions to complex challenges through collaboration across multiple disciplines, bringing together transformational approaches for purposeful application. This thread calls on students to identify, investigate, and solve problems through intentional integration of diverse methods. Students will utilize approaches from the arts, business, science, and the world of ideas to explore, question, disrupt, and enhance society through energized collaboration.

Students will:

- explore historical, cultural, scientific, creative, and socioeconomic contexts that foster and lead to bold thinking and innovative action;
- learn fundamental processes, principles, and theories that drive change;
- develop and experience networking and collaboration opportunities;
- transform innovative ideas with a positive social impact into proposals for self-sustaining social enterprise;
- demonstrate behaviors and skills essential for innovation developing their creative capacities by designing, implementing, and assessing projects.

This thread is 9 hours.

Students must take at least one course from the 2000 level or above.

Courses must be from a minimum of two disciplines.
