Major:

Chemistry (B.S.)

The Bachelor of Science degree is for those who wish to emphasize their study of chemistry.

Students interested in chemical engineering can participate in the Engineering Dual-Degree Program. Chemical Engineering students complete either a B.A. or B.S. degree in Chemistry at NWU and any remaining engineering program requirements at one of our participating schools of engineering.

For students interested in studying pre-health, a program of study emphasizing a strong background in chemistry is available for students planning a future in medicine.

***This Chemistry major earns a B.S. degree. However, if a student has a first major that is associated with a different baccalaureate degree, the Chemistry major may serve as a second major for the degree associated with the first major (B.FA.,*

B.M., B.S.N.). Note that if the first major is associated with a B.A. degree, there are different Chemistry major requirements for a B.A. degree.
