Nebraska Wesleyan University

ART 1800 Introduction to Metalsmithing

Catalog

2020-2021

Course Description

This course introduces students to basic tools and construction techniques in metalsmithing for use in jewelry/small sculpture fabrication. Although other materials may be introduced into a design, nickel, copper, and brass will be the primary media. Beyond the technical, students are expected to work to develop beginning conceptual problem solving within the context of the contemporary metalsmithing/jewelry field.
