Nebraska Wesleyan University

SOC 3210 Thinking SocioLogically: Environment

Catalog

2020-2021

Course Description

This course is part of the Thinking SocioLogically cluster and is centered on reading, discussing and critically analyzing a wide variety of perspectives on the environment, using environmental sociology as a touchstone for synthesis. The topics range across classical and key debates. Students are encouraged to develop a personal environmental ethic to help frame their personal life choices and societal engagement.

Prerequisite(s): SOC 1110 Introduction to Sociology

Archway Curriculum: Integrative Core: Humans in the Natural Environment Thread
