Majors, Minors & Degrees:

Majors

Business-Sociology (B.S.)

Sociology-Anthropology (B.A., B.S.)

Minors

Environmental Studies

Family Studies

International Policy

Departments/Programs:

Sociology and Anthropology

This course examines the demographic and social dynamics of population size, composition, and distribution. It addresses the relationships among population, human health, development and the environment. Strong cross-cultural emphasis. A major focus is the development of a semester research paper contrasting the status of the Millennium and Sustainable Development Goals, environmental status, and health in a more- and less- developed country.
