

SOC 3210 Thinking SocioLogically: Environment

2 hours

Majors, Minors & Degrees:

Majors

Sociology-Anthropology (B.A., B.S.)

Minors

Environmental Studies

Departments/Programs:

Sociology and Anthropology

This course is part of the Thinking SocioLogically cluster and is centered on reading, discussing and critically analyzing a wide variety of perspectives on the environment, using environmental sociology as a touchstone for synthesis. The topics range across classical and key debates. Students are encouraged to develop a personal environmental ethic to help frame their personal life choices and societal engagement.

Prerequisite(s): SOC 1110 Introduction to Sociology
