**2 hours**

**Majors, Minors & Degrees:**

**Majors**

Sociology-Anthropology (B.A., B.S.)

**Minors**

Environmental Studies

**Departments/Programs:**

Sociology and Anthropology

This course is part of the Thinking SocioLogically cluster and is centered on reading, discussing and critically analyzing a wide variety of perspectives on the environment, using environmental sociology as a touchstone for synthesis. The topics range across classical and key debates. Students are encouraged to develop a personal environmental ethic to help frame their personal life choices and societal engagement.

*Prerequisite(s): SOC 1110 Introduction to Sociology*
