Nebraska Wesleyan University

DATA 1300 Foundations of Data Analytics I

Catalog

2022-2023

Course Description

In an increasingly data-driven world, everyone should be able to understand the numbers that govern our lives. Whether or not you want to work as a data analyst, being "data literate" will help you in your chosen field. In this course, you'll learn the core concepts of inference and data analysis by working with real data. By the end of the term, you'll be able to analyze large datasets and present your results. This course is an online class offered through the Lower Cost Models Consortium. The class has optional live sessions.

Course Hours

3 hours
