**DATA 2200 Forecasting And Logistics**

**3 hours**

**Majors, Minors & Degrees:**

**Majors**

Data Analytics (B.A., B.S.)

**Departments/Programs:**

Mathematics and Computer Science

Supply chain management is the process by which organizations get us the products we consume, and companies need talented employees to help optimize their supply chain. This course will teach you how to use forecasting techniques to match supply and demand, and how to develop logistics networks that help minimize costs and deliver top customer service. This online class has optional live sessions. This course is an online class offered through the Lower Cost Models Consortium. The class has optional live sessions.
