

PHYS 1200 Energy and the Global Environment

4 hours

Majors, Minors & Degrees:

Majors

Exercise Science (B.S.)

Innovation and Entrepreneurship (B.S.)

International Studies (B.A., B.S.)

Science Education (B.A., B.S.)

Minors

Environmental Studies

International Studies

Departments/Programs:

Physics

A course covering some of the most critical problems facing the world today - those relating to the production, distribution, and use of energy. The basic concepts of heat, work, electricity and energy as they apply to energy use around the world will be studied. The major source of energy, their value and importance, the historical and future demand for energy and the specific environmental problems and benefits encountered will be identified.

Three lectures and one laboratory per week.

Prerequisite(s): One year of high school algebra or permission of instructor.

(Normally offered alternate fall semesters.)
