Sociology (B.A., B.S.)

Minors

Environmental Studies
Family Studies
International Policy
Public Health

Departments/Programs:

Sociology

This course examines the demographic and social dynamics of population size, composition, and distribution. It addresses the relationships among population, human health, development and the environment. Strong cross-cultural emphasis. A major focus is the development of a semester research paper contrasting the status of the Millennium and Sustainable Development Goals, environmental status, and health in a more- and less- developed country.
