

Course:

IDS 2030 Innovative Approaches to Wicked Problems

2 hours

Departments/Programs:

Interdisciplinary Studies

In this course students will explore current (innovative) approaches for solving the (wicked) complex problems of a generation. By engaging in a design- or systems-thinking approach, students will develop, share, and refine strategies through active collaboration, exploration, and connection both on and beyond campus, seeking out community experts, and will culminate coursework with a final team demonstration of an innovative solution.

Prerequisite(s): Sophomore standing.
