Project Management

Certificates

Project Management

Departments/Programs:

Business, Accounting and Economics (Undergraduate)

Any successful project starts with a plan. This course provides students with a deep understanding of project planning. Projects are a series of tradeoffs between scope, cost, and time, so students will need to learn how to balance them to create a realistic and achievable plan. Students will also learn to leverage resources and manage risk, quality, and stakeholder expectations to ensure project success. This course is an online class offered through the Lower Cost Models Consortium. The class has optional live sessions.

Prerequisite(s): Grade of "C-" or better in BUSAD 1650 Introduction to Project Management.
