

**Course:**

**ATTR 5700 Pharmacology and Nutrition**

**3 hours**

**Majors (Grad)**

Athletic Training (M.A.T.)

**Departments/Programs:**

Health and Human Performance (Graduate)

This course is designed to provide an extensive framework of knowledge through the study of medications and nutrition. Students will study drugs according to classifications including characteristics of typical drugs, their purposes, side effects, precautions or contraindications, and interactions and the recommendations to patients on nutrients.
