

**Certificate:**

## **Project Management**

The objective of the Project Management Certificate is to equip students with the skills necessary to start a project management role and be successful with minimal onboarding. The skills range from the hard skills that often overlap with project management requirements to more process-oriented skills such as agile methodologies and quality assurance.

Students completing this certificate will be able to:

1. Critically assess the application of waterfall and agile methodologies for different projects within a business context, and justify their decisions and any associated financial investment.
  2. Construct detailed project plans that take into account scope, resource constraints, dependencies, and quality assurance.
  3. Ensure quality of execution for a given project and complete projects that adapt to changing circumstances.
- Training in Microsoft Project and other tools, and
  - Skills needed for a lucrative career in project management.

Students completing this certificate should be ready to sit for the Certified Associate in Project Management Exam.
