

BUSAD 5670 Python For Business Analytics

3 hours

Majors (Grad)

Business Administration (M.B.A.)

Departments/Programs:

Business, Accounting and Economics (Undergraduate)

Managers who hope to stay competitive in business analytics need to be able to scale their analytics-and Python provides that solution. This course covers Python's significance in business analytics, setting up the Python environment, and learning basic syntax. You'll leverage three of Python's essential libraries-NumPy for numerical data, Pandas for data manipulation, and Matplotlib for data visualization-to use data to solve complex business problems.
