Nebraska Wesleyan University

BUSAD 5710 Network Architectures For Cyber Managers

Catalog

2025-2026

Course Description

In order to ensure a house is safe, we need to know how it's built. It's the same for cybersecurity: to ensure systems are secure, we need to understand their design and the unique security challenges of different network architectures and data storage solutions. By the end of this course, you'll be able to critique security for various network designs, including IT and OT systems, cloud environments, data storage, and IoT networks, in terms of cyber risk.

Course Hours

3 hours

Departments

1. Business Administration (Graduate)
