

CHEM 2110 Organic Chemistry II: Synthesis and Mechanisms

Catalog

2026-2027

Course Description

A continuation of [CHEM 2100 Organic Chemistry I](#). A study of reactions of importance in the synthesis and biosynthesis of carbon compounds, including reaction mechanisms and spectroscopic methods for the determination of structures.

Three lectures per week.

Prerequisite(s): [CHEM 2100 Organic Chemistry I](#) with grade of "C-" or better.

(Normally offered each fall semester.)

Course Hours

3 hours
