

Course:

CYBER 3400 Ethical Hacking

3 hours

Majors, Minors & Degrees:

Majors

Cybersecurity (B.A., B.S.)

Departments/Programs:

Business, Accounting and Economics (Undergraduate)

To stop a hacker, you need to be able to think like a hacker. In this course, you will learn hands-on techniques for attacking and penetrating networks and systems. You'll learn the tools to launch these offensive tactics and then complete a hands-on project where you will be asked to ethically hack a real system. Prerequisite: CYBER-2400
