

Course:

ACCT 5010X Accounting Analytics For Decision Making

3 hours

Departments/Programs:

Business, Accounting and Economics (Undergraduate)

This course helps students develop the necessary skills to understand and analyze accounting information. The objective is to use accounting information to make the best decisions and develop the ability to evaluate and analyze financial and non-financial data. Emphasis is placed on understanding the breadth of accounting analytics and the utilization of accounting analytics for analysis. The course highlights the linkages between accounting information, management planning, and decision making.
