Minors

Project Management

Certificates

Project Management

Departments/Programs:

Business, Accounting and Economics (Undergraduate)

Imagine skydiving without a parachute-that's what it's like to run a project without a risk management plan. This course teaches you to see the storm coming and prepare, turning looming disasters into manageable challenges. You'll learn to cut through the noise, create clear action plans, and keep control even when the pressure is on. Be the manager who's ready for anything, who stays calm, steady, and ahead of the game when things get tough.
